

Career Objective	<p>As a Full Stack Developer, I am seeking to join a dynamic team where I can utilize my passion for building user-friendly and functional web applications. With experience in back-end technologies such as Java, Spring Boot, and microservices, as well as front-end technologies like HTML, CSS, and React, I am well-equipped to handle the full stack development process. I am also skilled in DevOps tools like Docker and AWS EC2, and proficient in Git, agile methodologies, and Scrum.</p> <p>As a quick learner who enjoys being challenged, I am committed to continuously learning new design techniques, languages, and development techniques to support the success of the organization I work for. My strong soft skills, including quick learning, self-motivation, problem-solving, and team collaboration, make me an asset to any team.</p>		
Skills	<p>Experienced in back-end technologies including Java, Java Spring Boot, microservices, C#, ASP.NET, PHP, Laravel, SQL, No SQL, Node.js, Express, Ruby on Rails and groovy on rails</p> <p>Proficient in front-end technologies such as HTML, CSS, JavaScript, jQuery, Bootstrap, Thymeleaf, React and Angular.</p> <p>Skilled in DevOps tools like Docker and AWS EC2</p> <p>Proficient in Git, agile methodologies, and Scrum</p> <p>Strong soft skills including quick learning, self-motivation, problem-solving, and team collaboration</p>		
Project	“University Management”		spring 2022 GitHub
	<p>Developed a comprehensive system for managing university operations, including student registration, course management, and grading system for teachers.</p> <p>Utilized Java Spring Boot and Thymeleaf for the back-end and front-end.</p> <p>Implemented a SQL database to store and retrieve data.</p>		
	“Banking system simulation”		winter 2022 GitHub
Highlights	<p>Created a simulation of a banking system using PHP and the Laravel framework.</p> <p>Implemented features such as account creation, account management, and money transfer.</p> <p>With this system, users can send money to other users from their contact list. The recipient can then choose to accept or decline the transfer, and if they accept, the money will be deposited into their account.</p>		
	“Book Stack”		Summer 2022 GitHub
	<p>Developed an online bookstore using ASP.NET 6 as the back-end and React as the front-end.</p> <p>Implemented features such as book search, book details, and shopping cart.</p> <p>Implemented an administrative panel that allows the performing of CRUD (create, read, update, delete) operations on user accounts, book categories, and products (books).</p>		
	“Memoriact”		spring 2022 GitHub
	<p>Created a web application for creating and studying flashcards using the MERN stack(React, Node, MongoDB ,Express).</p> <p>Implemented features such as card creation, study mode, and progress tracking.</p> <p>Implemented two types of decks: public and private. All users can view the public decks, but private decks are only accessible to the owner</p>		
	“Railway Management”		winter 2022 GitHub
	<p>Implemented with Java Spring Boot, HTML, CSS, JDBL , Hibernate.</p> <p>Developed a system for managing railway operations, including ticket booking and train scheduling.</p> <p>Utilized Java Spring Boot and JDBL for the back-end and HTML, CSS, Thymeleafe for the front-end.</p> <p>Implemented administrative panel that allows the performing of CRUD operations on user accounts, Routes, Trains , Schedules and Get reports.</p>		

Experience	Full stack Developer in Groupe GSC Montreal ,Quebec (2023/2-now)		
	<ul style="list-style-type: none"> • Carry out back end development and programming With Grails and Spring. • Carry out front end development and programming With Angular fork. • Carrying out analyzes of functional and technological needs. • Drafting of technical specifications. • Maintenance and correction of anomalies in the various applications. • Analysis and documentation of change requests • Monitoring of technological developments and recommend changes to hardware and/or software. • Used technologies: Grails ,Spring ,Angular framework, MySQL, Type Script, Less, Figma 		
	Full Stack Developer intern in Kinoklik Montreal ,Quebec 2022/9 – 2022/12		
	<ul style="list-style-type: none"> • Developed and maintained the company's website using Ruby on Rails and HTML, CSS. • Worked on a new project using the MERN stack (Node.js, Express, MongoDB back-end, React front-end). • Collaborated with a cross-functional team in an agile environment, participating in daily Scrum meetings. 		
	Web Developer in RayanPardaz Tehran ,Iran 2016-2018		
Education	<ul style="list-style-type: none"> • Created and maintained a variety of websites using HTML, CSS, and Java Spring Boot. • Worked in a fast-paced, agile environment, participating in daily Scrum meetings. • Created and maintained a variety of online shopping websites.
